Dedicated Cloud Telephone System

This service provides members the opportunity to replace their current telephone system by renting a cloud system dedicated to their company.

Advantages:

- Operating costs versus acquisition costs
- No licences to pay
- All inclusive
- Upgrade/improvement included in monthly rental
- Accessible via an internet connection, this infrastructure can be protected and be independent of all other frameworks
- No technical expertise required for installation, configuration and maintenance of the system
- Local to local between offices, employees and satellite employees (residential line is not used)

Available Options:

- In case of failure, system will continue to work via our sites or server on site

Functionality(current) :

- Call Waiting;
- Block/Allow/Transfer
- Anonymous calls
- Recordings
- Simplified call history design
- Three-way conference
- Voice Messaging
- Copy of messages available via email
- Advanced listening
- Various welcome message
- Multilingual
- Prompt to caller to leave a message
- Visual indicator on phone or on main console
- Call Hold

And many more!
