Cloud Computing Capacity

Our service offers members the possibility to replace in whole or part their IT servers by one or several cloud servers installed in a controlled, secure and supervised environment. This offering can also be used to lower costs as part of your overall business plan, by offering cloud services for applications and/or important information.

Advantages:

- Operating costs versus acquisition costs
- Eliminated replacement costs after 3 to 5 years
- All inclusive
- Available capacities on demand
- Memory, processors and disk space

Available Options:

- A complement or relief of IT staff;
- Pricing per bank of hours;
- Via our diverse cloud environment, data center infrastructures become redundant
- 24/7, 365-day support
- Management of computers and licences
- Management and supervision of routers, switches and firewalls
