## Telephone Stations on shared cloud

This service offers the opportunity to our members to replace their phone system by a cloud system at no cost or minimal investment.

### **Advantages:**

- Operating costs versus acquisition costs
- Upgrade/improvement included in monthly rental
- Accessible via an internet connection, this infrastructure can be protected and be independent of all other frameworks
- No technical expertise required for installation, configuration and maintenance of the system
- Local to local between offices, employees and satellite employees (residential line is not used)
- High demand periods supported. Therefore no need to calculate the number of lines required by size of company
- We will dispose of your old equipment ecologically
- Seasonality

### **Menu of Additional Options:**

- Call Recording
- Call Center

**Many Functionalities are offer!**
